

Fender Eliminator Kit Low Profile for 2009-2020 Aprilia RSV4/2011-2020 Tuono

Part No. FE-A9RSV4-LP

Parts List

x1 Plate Holder	x2 M6x25mm bolts	x4 M6 large OD washer
x1 Cover Plate	x1 M6x16mm bolts	x6 M6 lock nuts
x1 LED license plate light	x4 M6x14mm bolts	x2 Plastic spacers
x1 4-pin connector main harness kit	x3 M6 washers	

1. Remove rear trunk lid, reach down and unplug the 4 pin white square connector for the left/right signals and license plate light
2. Remove the 3 bolts from underneath the fender (1 bolt hidden under the circular plastic cover and 2 bolts/2 nuts) and carefully drop it down. These bolts/nuts will no longer be used
3. Peel and stick the 2 plastic spacers to the back of the cover plate lower 2 mounting holes
4. Attach the license plate LED light to the plate holder making sure the LED face down towards the license plate
5. Mount the license plate using 4 M6x14mm bolts, M6 large OD washers and M6 lock nuts
6. While routing the license plate light wires through the feed path up through the undertail, mount the plate holder to the cover plate's 2 lower holes to the bike's under tail using 2 M6x25mm bolts, M6 washers, and M6 lock nuts. A second person can be helpful to aid with feeding the wires. See illustration
7. Using the remaining M6x16mm bolt and M6 washer, secure the cover plate at to topmost mounting hole.
8. Plug in the new 4 pin connector harness assembly from this kit back into bike (from step 1 above)
9. Plug in the license plate light to the 4 pin connector main harness, White>White and Black>Black
10. The 4 pin connector main harness will also have output for optional turn signal connection. This harness is the same ones used in our integrated tail lights.
