

Ducati 848/1098/1198 Fender Eliminator Kit

Parts List

x1 License plate holder
x1 License plate LED light
x1 License plate LED light harness
x4 6x12mm allen bolts
x4 6mm nylon nuts
x4 washers
x2 Turn signal adapters

1. Remove seat (2 allen bolts under corners) and seat cowl
2. Remove left and right trims
3. Remove upper tail section (4 allen bolts_ and unplug tail light, turn signals and license plate light)
4. Remove both mufflers (1 bolt and 1 spring each)
5. Remove rear fender (3 allen bolts to remove cover plate in back fender) and then 2 more allen bolts to remove entire fender. Keep these bolts for reuse later. Unplug turn signal wires and mark L and R for reinstalling later
6. Remove fender mounting block (4 nuts) and pull all stock wiring up through underside of tail section
7. Mount license plate LED light to license plate holder and feed wires through back. Connect the plug and play harness adapter
8. Mount license plate using 4 6x12mm allen bolts, washers, and nuts
9. Optional: Mount the turn signal adapters behind the license plate holder using the same bolts, washers, and nuts in step 8. Mount the factory turn signals using existing hardware
10. Mount the license plate holder to the fender mounting block but do not tighten. Feed the license plate LED light wire (and turn signal wires if used) through the block. Remount the block to the bike and tighten
11. Connect license plate light (and turn signals if used) and check all lighting
12. Reinstall tail section, side trim, seats, mufflers then tighten the 2 allen bolts to secure the license plate holder
