

# Kawasaki Ninja ZX-6R 2013-2016 Fender Eliminator Kit

## **Parts List**

x1 License plate holder  
x1 License plate LED light  
x1 License plate adapter harness  
x4 6x12mm allen bolts  
x8 6mm nylon nuts  
x8 Washers  
x2 Optional signal adapters

1. Remove rear seat and tool bag
2. Remove the left side long black plastic side panel/cover that runs from below the main seat all the way to right below the clutch handlebar grips. 3 screws need to be removed towards the front. The panel slides back and pulls outwards.
3. Remove the main seat. 1 screw from each side. Make sure to use the proper tool with good torque. Make good contact and careful not to strip.
4. Remove center panel. Remove rear left side panel. 3 screws on top and 1 plastic rivet close to battery. Slide forward then outward to remove. All the wire plugs are hidden under this panel. Unplug the license plate light plug and turn signal plugs.
5. Remove the 4 screws securing the rear fender. Keep these screws for reuse later. Carefully remove the rear fender assembly and all its wiring
6. Mount the license plate LED light and run the wire through the center hole. Make sure LEDs are facing down.
7. Mount the license plate holder using the 4 screws removed in step 5 above with 4 washers and 4 nylon nuts. Connect the license plate adapter harness and plug into bike's harness. White>White, Black>Black
8. Optional: Mount the aftermarket turn signal adapters to the 2 upper license plate mounting holes on the plate holder using two 6x12mm allen bolts, washers, and nuts.  
Bolt>Plate>Plate holder>Adapter>Washer>Nut
9. Check all lighting
