

Yamaha FZ6R 2009-2016 Fender Eliminator Kit

Parts List

- x1 License plate holder
- x1 Block plate
- x1 License plate LED light
- x1 License plate adapter harness
- x4 6x12mm allen bolts
- x4 6mm washers
- x4 6mm nylon lock nuts
- x4 8mm washers
- x4 8mm nylon lock nuts
- x2 OEM signal adapters
- x2 Aftermarket 10mm signal adapters

Holes A:
To be used with Motodynamic integrated tail light

Holes B:
To be used with external LED license plate light (stock tail light)

1. Remove rear seat and unbolt rear fender (4 bolts). Keep these bolts for reuse later.

2. Unplug left and right turn signal connectors as well as license plate light connector

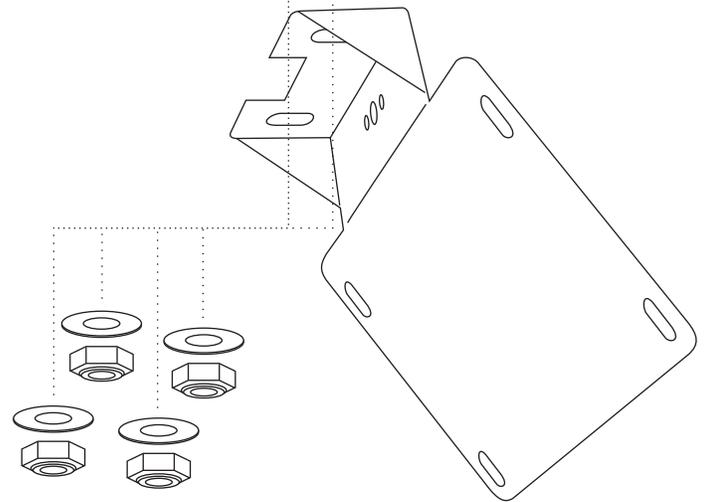

3. Mount block plate and license plate holder to the bike using the 4 bolts removed from step 1 and four M8 bolts and washers supplied in this kit. Mount the license plate holder to Holes A for use with Motodynamic's integrated tail light or Holes B and use the included LED plate light. Holes B are to be used with the stock tail light.

4. Attach the LED license plate light to plate holder. Feed wires through rear hole on fender hole block plate. Attach adapter harness to LED plate light (Red>White wire and Black>Black wire) and plug it back into bike removed from step 2.

5. Mount license plate to plate holder using four 6x12mm bolts, washers, and lock nuts from this kit.

6. Optional: Mount OEM or aftermarket turn signal adapters to license plate mounting holes on plate holder using two/four 6x12mm allen bolts, washers, and nuts. Install OEM or aftermarket turn signals onto adapter and route wires through rear hole of the fender hole block plate and plug into appropriate plug removed from step 2. Aftermarket signals may require wiring. Refer to illustration on right to mount factory signals.

8. Check all lighting
