

Turn Signal Brackets for Ducati Performance LED Turn Signals

[Clamp around style w/ 6mm groove Ducati OEM part# 53010501A/53010511A - Ducati Monster]
SKU: TSB-DP-6MM

1. Measure the groove width and make sure it is 6mm

2. Insert the spacer using a twisting/rocking motion. Take note of the orientation and make sure the opening is facing down.

3. Push/slide the spacer all the way towards the inner lip

4. Insert/slide the rear facing bracket from back to front.

Step 4 view from other angle

Step 4 with rear facing bracket inserted all the way

5. Insert/slide front facing bracket from front to rear, until the 2 lower elongated hole aligns from each bracket.

6. Repeat other side. Now ready to mount on back of plate holder for Ducati standard fender eliminator kits.
